INTRODUCTION TO THE CLEAR APPLICATION

Thomson Reuters, in close collaboration with Palantir and Praescient Analytics, has developed an application incorporating CLEAR public records data within the Palantir analytic platform.

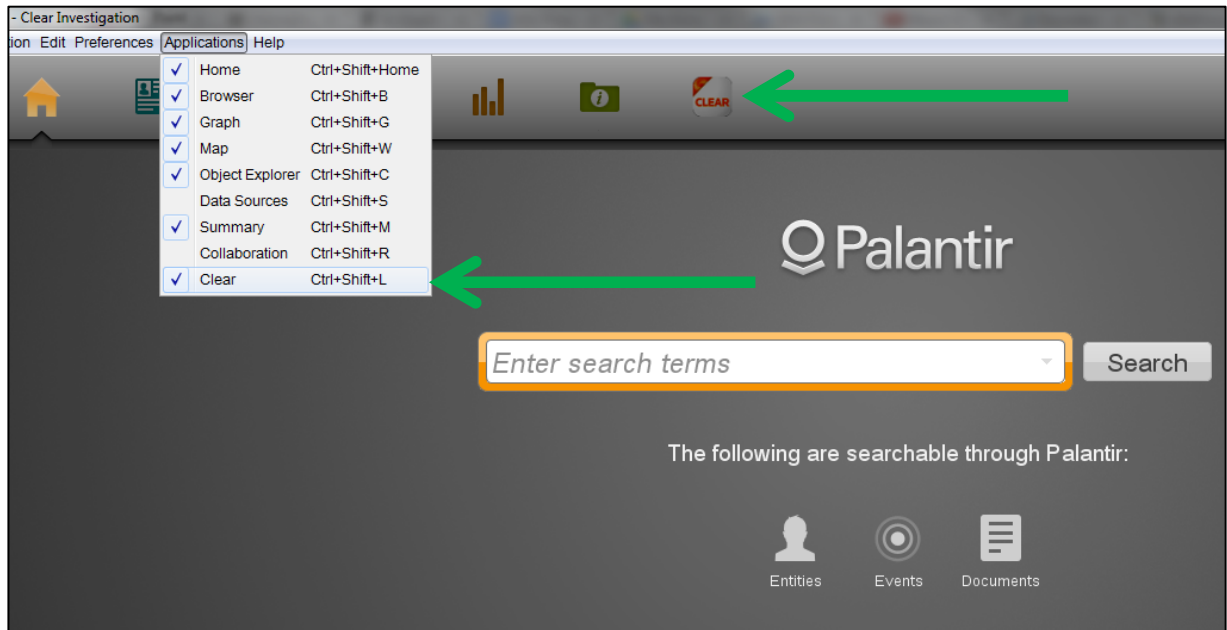

CLEAR organizes and aggregates public and proprietary records data from many different sources to provide access to data that is both current and robust in coverage.

This User Guide will demonstrate how to use the application to conduct a public records investigation. All data related to people and events within this document are notional, and any resemblance to real people or events is purely coincidental.

Thomson Reuters is committed to protecting privacy, civil rights, and civil liberties. CLEAR data is subject to strict federal laws. All CLEAR customers are organizations credentialed by Thomson Reuters, many of whom are law enforcement agencies. All searches must have a valid, permissible use related to an investigation.

I. OPENING THE CLEAR APPLICATION IN PALANTIR

Click on the CLEAR Application in Palantir's Applications menu to enable the CLEAR Application within Palantir. Then, click on the CLEAR icon in the Palantir toolbar to open the CLEAR Application.

II. PERFORMING A CLEAR SEARCH

A. Phone Search – Overview

A Phone Search may be used to find information related to a phone number, including subscriber name (person or business), address, and carrier data. In addition, this search may also include applicable consumer bureau data and utility records.

Searches may be conducted either by providing a name and/or address to obtain a phone number, or by providing a phone number, which is referred to as a reverse phone lookup, to obtain the associated subscriber name and address of a person or business.

The Phone Search tab contains two data source search options: Reverse Phone Lookup and Public Record Phones.

- The Reverse Phone Lookup search is intended to find the associated subscriber of a phone number
- The Public Records Phones search is intended to find Persons, Businesses, Addresses and Phones associated with your search criteria

When you conduct a Phone Search, you have the option of searching against one or both of these data sources.

The screenshot displays the 'Clear Search' application window. The 'Phone Search' tab is selected, and the 'Reverse Phone Lookup' radio button is highlighted with a green circle. The form includes fields for 'Phone Number', 'First Name', 'Last Name', 'Business Name', 'Address', 'City', 'State', 'Canadian Prov/Terr', 'Zip Code', 'Reference', 'GLB Code', 'DPPA Code', and 'Voter Code'. A green arrow points to the 'Voter Code' field. The 'Search' button is located at the bottom right of the form. The application version '1.1.0.9' and 'Built by Prescient Analytics' are visible in the bottom right corner.

Note on Permissible Use Codes: In order to perform any search within the CLEAR Application, you must enter a code for all three Permissible Purpose Code fields (GLB Code, DPPA Code, and Voter Code). If you are unsure about which values to use for these fields, please consult your organization's analyst staff management.

To maintain compliance with the privacy provisions of the federal Gramm-Leach-Bliley Act, and the subsequent regulations adopted by the Federal Trade Commission ("GLB"), you must select only a single purpose from the presented list. Misrepresenting your access purpose is a violation of our subscriber agreement and certain federal and state laws. Any use of information maintained by West, a Thomson Reuters business, other than for the selected permissible purpose is grounds for account termination and may be referred to the appropriate governmental agency.

The Driver's Privacy Protection Act (DPPA) was enacted to prevent any Department of Motor Vehicles (DMV) officer, employee or contractor from knowingly disclosing or making available to any person or entity the personal information (Social Security Number, Date of Birth, Driver License number, name, address, phone number, etc.), associated or contained within a motor vehicle record. This act does not include or affect accident reports, violations (MVRs) and driver status.

There are several possible exemptions for individuals or entities to access DMV-based personal information. Since CLEAR is a restricted service, we have shortened and combined some of these exemptions to reflect our current customer base.

Due to data privacy restrictions imposed by state laws, users accessing voter registration records will be required to acknowledge compliance with the law and to indicate the intended permissible "use" for the data.

B. Phone Search – Conducting a Search

1. Check the boxes for the data sources you would like to include in your search.
2. Fill out the fields with information about the phone, business or individual you would like to search.
3. Optional: fill out the Reference field to name or annotate the reason for your search (this will not impact your search results).
4. When you are ready, click Search.

The screenshot shows the 'Investigation' application window with a menu bar (Investigation, Edit, Preferences, Applications, Help) and a toolbar with icons for home, list, user, globe, printer, and a 'CLEAR' button. On the right, there are buttons for 'import', 'update', and 'publish', along with a search bar containing the text 'Click here to search' and a 'Search' button.

The main content area is titled 'Search' and contains two tabs: 'Phone Search' (selected) and 'Person Search'. Under the 'Phone Search' tab, there are two sub-tabs: 'Reverse Phone Lookup' (selected) and 'Public Record Phones'. The form fields are as follows:

- Phone Number: 651-398-0726
- First Name: Jane
- Last Name: Sample
- Business Name: (empty)
- Address: (empty)
- City: (empty)
- Zip Code: (empty)
- State: Minnesota (dropdown menu)
- Canadian Prov/Terr: (empty)
- Reference: (empty)
- GLB Code: A - For use in complying with federal, state, or local laws, rules, and other applicable legal requirements. (dropdown menu)
- DPPA Code: 1 - For official use by a Court, Law Enforcement Agency or other Government agency. (dropdown menu)
- Voter Code: 2 - Use in connection with a non-commercial purpose. (dropdown menu)

At the bottom right of the form, there are 'Reset' and 'Search' buttons. The footer of the application window indicates '1.1.0.9 Built by Prescient ANALYTICS'.

C. Phone Search – Results

1. After you click Search, you will see the results in the top right of your screen. You may find multiple results for your search query based on the CLEAR data that matched your search criteria.
2. Select one or more of the results to display a preview snapshot of that result in the bottom right of the screen.
3. Click on Add to Graph to add the result objects to the Graph Application.
4. Click on Order Report to request a comprehensive report for the selected subject. (See Section III A: Requesting a Report: Phone Search for further instruction).

The screenshot displays the CLEAR Phone Search interface. On the left, the 'Phone Search' tab is active, showing a search form with fields for Phone Number (651-396-0726), First Name (Jane), Last Name (Sample), Address, City, Zip Code, State (Minnesota), Canadian Prov/Terr, Reference, GLB Code, DPPA Code, and Voter Code. A green arrow points from the 'Business Name' field to the search results table. The search results table in the top right corner shows one result: 651-396-0726, Jane. The bottom right corner shows a preview snapshot for the selected result, including fields for Phone, Name, Address, and a section for Reverse Phone Gateway. The 'Add to Graph' and 'Order Report' buttons are circled in red.

Relevance	Name	Phone Number	Address
99	JANE SAMPLE	(651) 396-0726	...

1-JANE S...

Phone: (651) 396-0726
Name: JANE SAMPLE
Address: ..

Reverse Phone Gateway
Name: Unavailable
Phone: (651) 396-0726
Utility Listing
Name: JANE SAMPLE
Phone: (651) 396-0726
Address: 1920 FERONIA AVE 2, SAINT PAUL, MN, 55104-3881

D. Phone Search – Adding to Graph

After you click Add to Graph, the Graph icon will flash and the selected search result objects will be visible on the Graph workspace.

The screenshot displays the CLEAR investigation software interface. The main workspace shows a graph with a central node labeled 'JANE M SAMPLE' connected to three other nodes: 'JANE M SAMPLE', 'GARY F SAMPLE', and 'STILLWATER, MN'. The 'STILLWATER, MN' node is further connected to a node labeled '1-551-439-2881'. The timeline at the bottom shows a range from 1961 to 2068, with a bin size of 1 year. The right sidebar contains a 'Selection' tab and a 'Histogram' tab. The 'Object Types' section lists 'All Entities' (5), 'Person' (3), 'Location' (1), and 'Phone' (1). The 'Entity Properties' section lists various attributes with their counts: Address: Exact Match (1/1), Address: Required Match (1/1), Address: City State Match (1/1), Gender (2/2), Name: Exact Match (2/2), Name: Last Name Only (1/1), and Phone Number: Exact Match (1/1).

E. Person Search – Overview

A Person Search may be used to find information related to a subject using public record proprietary data. In addition, this search may also include applicable consumer bureau data, phone numbers, utility records, death filings, associated driver licenses, health care provider information, and any criminal or arrest records.

A Person Search is intended to find information about people across four data source search types:

- Public Record People (includes consumer bureau data, phone numbers, utility records, death filings, associated driver licenses, etc.)
- Work Affiliations
- Public Record Criminal and Infractions
- Real Time Incarceration and Arrests

When you conduct a Person Search, you have the option of using one or more of these search options.

The screenshot shows the CLEAR Person Search interface. The 'Public Record People' tab is selected and highlighted with a green oval. Below the search fields, there are three dropdown menus for 'GLB Code', 'DPPA Code', and 'Voter Code'. A green arrow points to the 'Voter Code' dropdown, which is currently set to '2 - Use in connection with a non-commercial purpose.' The interface includes various input fields for personal information like name, DOB, address, and phone number, as well as buttons for 'Reset' and 'Search'.

Note on Permissible Use Codes: In order to perform any search within the CLEAR Application, you must enter a code for all three Permissible Purpose Code fields (GLB Code, DPPA Code, and Voter Code). If you are unsure about which values to use for these fields, please consult your organization's analyst staff management.

To maintain compliance with the privacy provisions of the federal Gramm-Leach-Bliley Act, and the subsequent regulations adopted by the Federal Trade Commission ("GLB"), you must select only a single purpose from the presented list. Misrepresenting your access purpose is a violation of our subscriber agreement and certain federal and state laws. Any use of information maintained by West, a Thomson Reuters business, other than for the selected permissible purpose is grounds for account termination and may be referred to the appropriate governmental agency.

The Driver's Privacy Protection Act (DPPA) was enacted to prevent any Department of Motor Vehicles (DMV) officer, employee or contractor from knowingly disclosing or making available to any person or entity the personal information (Social Security Number, Date of Birth, Driver License number, name, address, phone number, etc.), associated or contained within a motor vehicle record. This act does not include or affect accident reports, violations (MVRs) and driver status.

There are several possible exemptions for individuals or entities to access DMV-based personal information. Since CLEAR is a restricted service, we have shortened and combined some of these exemptions to reflect our current customer base.

Due to data privacy restrictions imposed by state laws, users accessing voter registration records will be required to acknowledge compliance with the law and to indicate the intended permissible "use" for the data.

F. Person Search – Conducting a Search

1. Check the boxes for the data sources you would like to include in your search.
2. Fill out the fields with information about the individual you would like to search.
3. Optional: fill out the Reference field to name or annotate the reason for your search (this will not impact your search results).
4. When you are ready, click Search.

H. Person Search – Adding to Graph

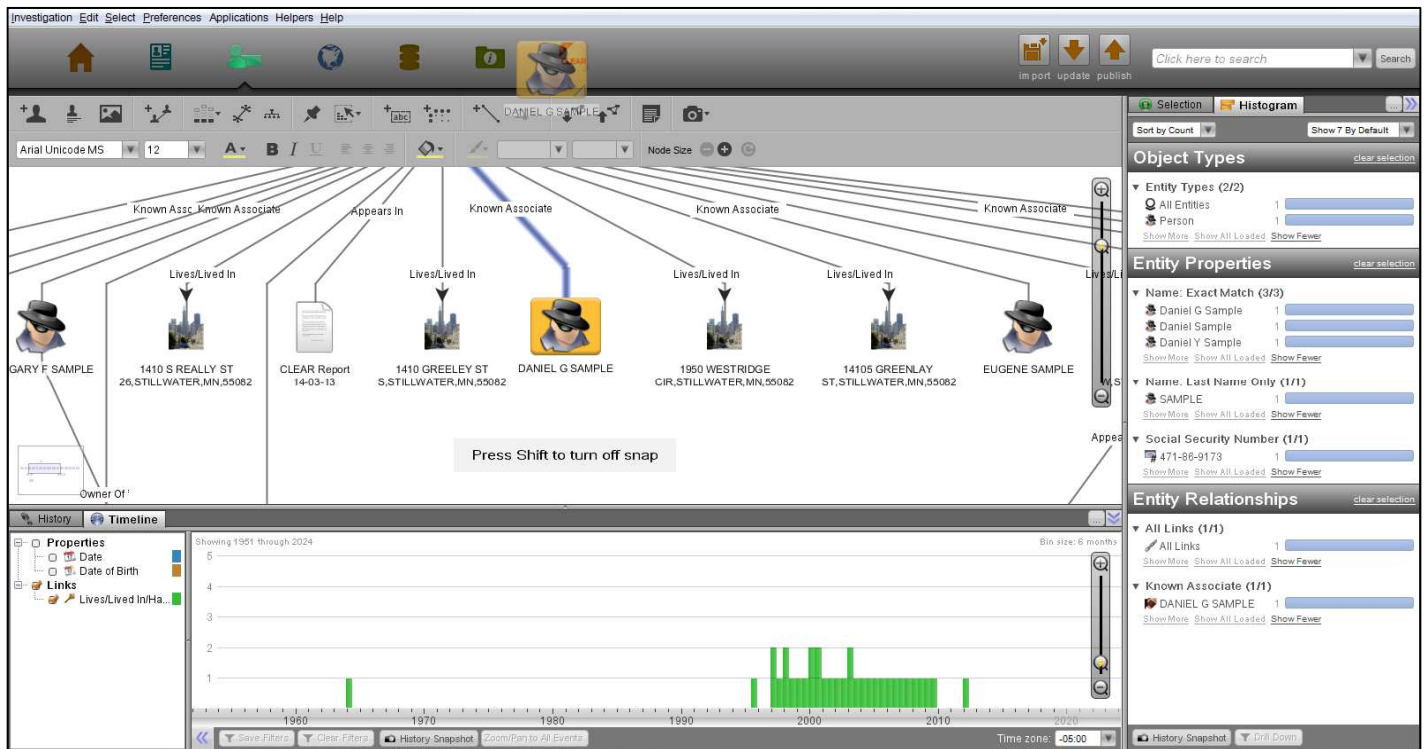

After you click Add to Graph, the Graph icon will flash and the selected search result objects will be visible on the Graph workspace.

I. Dragging Objects from the Graph to CLEAR

Objects on the Graph Application workspace can be dragged into the CLEAR Application to perform a search.

1. Select the object you would like to conduct a search on, and drag it with your mouse onto the CLEAR Application icon on the Palantir toolbar.

2. The object you have dragged into the CLEAR Application will now populate the fields of the appropriate searches.
3. Select the tab for the type of search you would like to perform.
4. Select any data sources you would like to include in your search and refine your search criteria as necessary.

5. When you are ready, click Search.

The screenshot shows the CLEAR (Clearinghouse for Law Enforcement and Analytics Reporting) web application interface. The top navigation bar includes links for Investigation, Edit, Preferences, Applications, and Help. Below this is a toolbar with icons for home, user, database, and a 'CLEAR' button. On the right, there are buttons for 'import', 'update', and 'publish', along with a search link and a 'Search' button.

The main content area is divided into two tabs: 'Phone Search' and 'Person Search'. The 'Person Search' tab is active, displaying a form with the following fields and options:

- ☒ Public Record People
- ☐ Public Record Criminal and Infractions
- ☐ Work Affiliations
- ☐ Real Time Incarceration and Arrests
- First Name:
- Driver's License Number:
- ☐ First Name Begins With:
- Middle Name:
- SSN:
- Last Name:
- Secondary Last Name:
- DOB (YYYY-MM-DD):
- Address:
- City:
- County:
- Age Begin:
- Zip Code:
- End:
- State:
- Phone Number:
- Canadian Prov/Terr:
- Reference:
- GLB Code:
- DPPA Code:
- Voter Code:

At the bottom right of the form, there are two buttons: 'Reset' and 'Search'. A green arrow points to the 'Search' button.

The footer of the application indicates the version is 1.1.0.9, built by Proscient Analytics.

III. REQUESTING A REPORT

A. Requesting a Report: Phone Search

1. When you click Order Report as part of a Phone Search, you may be presented with a “Candidates” list, which is a list of potential person subjects for the report that are associated with the Phone Search results returned. You must choose one of these candidates before generating a report.
2. On the left side of the screen, check one of the Report Type options:
 - **Contact Report:** Contains primary subject information including alias and address information. This report also provides information on 1st degree relatives, neighbors, and associates, which include listed phone numbers and most recent addresses.
 - **Basic Report:** Contains the subject information as well as address information from three consumer reporting agencies. Two of the consumer reporting agencies are live gateway calls that will return the most up-to-date information they have for the subject. This report also includes other national and state databases for a summary of historical addresses, information related to Social Security Numbers, employers, driver licenses, phone numbers, and infractions.
 - **National Comprehensive Report:** Contains the subject information as well as address information from three consumer reporting agencies. Two of the consumer reporting agencies are live gateway calls that will return the most up-to-date information they have for the subject. This report also includes other extensive national and state databases for a summary of assets, driver licenses, professional licenses, real properties, vehicles and much more.
 - **Provider Comprehensive Report:** Contains information across all states associated with the subject. Information returned will include the subject's name, aliases, social security number, dates of birth, address and phone history. Live gateways to two consumer bureau agencies return the most up-to-date information available for the subject. In addition, the report will include other extensive national and state database for a summary of Federal and State Sanctions, NPI records, Assets, Driver Licenses, Nationwide Healthcare Licenses, Business Associations, Property Ownership, Live Gateway to Vehicle Registrations, and much more.
3. In the center of the screen, select the information you would like included on your subject's report.

4. Check the Get PDF Report box to generate a PDF version of the report in Palantir's Graph Application. The text of the report may be subsequently tagged within the Browser Application.
5. When you are ready, click Order Report.

The screenshot displays the Palantir Graph Application interface. The top navigation bar includes 'Investigation', 'Edit', 'Preferences', 'Applications', and 'Help'. Below this is a toolbar with icons for home, search, and report generation. The main content area is divided into several sections. On the left, a sidebar contains a 'Report' section with a green bracket highlighting the 'Get PDF report' option. The 'Report Type' section on the left has radio buttons for 'Contact', 'Basic', 'National Comprehensive', 'Provider Comprehensive', and 'Get PDF report' (which is selected). The 'Reference' section shows a dropdown menu with three options: 'JANE SAMPLE-DOCUMENT 240 SUMMIT AVENUE SAINT PAUL, MN' (highlighted with a green arrow), 'JANE SAMPLE, 1820 FERDINA AVE, SAINT PAUL, MN', and 'JANE SAMPLE, 1820 FERDINA AVE, SAINT PAUL, MN'. The 'Possible Relatives' section on the right includes 'Relatives - Degree of Separation' with radio buttons for 'First', 'Second', and 'Third'. The 'Possible Associates' section includes 'Add Associates Options' with radio buttons for 'Associates for the three most Current Addresses' and 'Associates for all Previous Addresses'. The 'Limit To' section has a dropdown menu. The 'Neighbor Listings for Subjects Addresses' section includes 'Add Neighbors Options' with radio buttons for 'Neighbors for the three most Current Addresses' and 'Neighbors for all Previous Addresses'. At the bottom right, there is a 'Clear Selections' button and an 'Order Report' button. The version number '1.1.0.9' and the Palantir logo are visible in the bottom right corner.

B. Requesting a Report: Person Search

1. Check one of the Report Type options on the left side of the screen:
 - **Contact Report:** Contains primary subject information including alias and address information. This report also provides information on 1st degree relatives, neighbors, and associates, which include listed phone numbers and most recent addresses.
 - **Basic Report:** Contains the subject information as well as address information from three consumer reporting agencies. Two of the consumer reporting agencies are live gateway calls that will return the most up-to-date information they have for the subject. This report also includes other national and state databases for a summary of historical addresses, information related to Social Security Numbers, employers, driver licenses, phone numbers, and infractions.
 - **National Comprehensive Report:** Contains the subject information as well as address information from three consumer reporting agencies. Two of the consumer reporting agencies are live gateway calls that will return the most up-to-date information they have for the subject. This report also includes other extensive national and state databases for a summary of assets, driver licenses, professional licenses, real properties, vehicles and much more.
 - **Provider Comprehensive Report:** Contains information across all states associated with the subject. Information returned will include the subject's name, aliases, social security number, dates of birth, address and phone history. Live gateways to two consumer bureau agencies return the most up-to-date information available for the subject. In addition, the report will include other extensive national and state database for a summary of Federal and State Sanctions, NPI records, Assets, Driver Licenses, Nationwide Healthcare Licenses, Business Associations, Property Ownership, Live Gateway to Vehicle Registrations, and much more.
2. In the center of the screen, select the information you would like included on your subject's report.
3. Check the Get PDF Report box to generate a PDF document version of the report in Palantir's Graph Application. The text of the report may be subsequently tagged within the Browser Application.

4. When you are ready, click Order Report.

The screenshot shows the Clear software interface. At the top is a menu bar with 'Investigation', 'Edit', 'Preferences', 'Applications', and 'Help'. Below the menu bar is a toolbar with icons for home, list, person, globe, folder, and a 'CLEAR' button. On the right of the toolbar are 'import', 'update', and 'publish' buttons, along with a search bar containing 'Click here to search' and a 'Search' button. The main window has a sidebar on the left with 'Search' and 'Report' tabs. The 'Report' tab is active, showing a 'Report Type' section with radio buttons for 'Contact', 'Basic', 'National Comprehensive' (selected), and 'Provider Comprehensive'. Below this is a 'Get PDF report' checkbox. To the right of these are several checkboxes for report content: 'Address Fraud Alerts', 'Driver's Licenses', 'Other Names', 'Phone Listings for Subject's Addresses', 'Real Property Ownership & Deed Transfers', 'Real-Time Vehicles', and 'Possible Vehicles'. Further right are sections for 'Possible Relatives' (with radio buttons for 'First', 'Second', 'Third') and 'Possible Associates' (with radio buttons for 'Associates for the three most Current Addresses' and 'Associates for all Previous Addresses'). Below these are sections for 'Neighbor Listings for Subject's Addresses' (with radio buttons for 'Neighbors for the three most Current Addresses' and 'Neighbors for all Previous Addresses'). At the bottom left is a 'Clear Selections' button. At the bottom right is an 'Order Report' button, which is highlighted by a green arrow. The bottom right corner of the window shows the version '1.1.0.9' and 'Built by Praxient'.

C. Adding to Graph from the Request Report Screen

After you have requested a report, you will have to option of adding the objects in the report to the Graph Application.

1. Select the sections of the report you would like to add to the Graph by checking the boxes on the left side of the screen. The sections of the report that are available to be added to the Graph are as follows:

- Subject Section (added to the Graph automatically)
- AKAs Section
- Other SSN's for Subject Section
- Address Section
- Address Fraud Section
- Phone Listing Section
- Real Time Vehicles Section
- Business Affiliations Section
- Criminal Section
- Possible Relatives Section
- Possible Associates Section

2. To preview a specific report section, select any of the hyperlinked report section titles on the left side of the screen or scroll through the report preview using the scroll bar on the right side of the screen.
